

1. MANUFACTURES DETAILS

DIMAQ XXI
Polígono Txiplau Pabellón 9.
20280 HONDARRIBIA (Gipuzkoa).
Tel.: 943 64 10 22 – Fax 943 64 11 33.

2. APPLIANCE OVERVIEW

PRODUCT	BONELESS MEAT FILLETING MACHINE
MODEL	EBAKI mini
DIMENSSIONS (length x width x height)	1570 x 700 x 1250
WEIGHT	120 kg.
INPUT VOLTAGE	3 F+ N + T 400 V
OPERATING VOLTAGE	24V
POWER	0.6 Kw

3. OVERALL DESCRIPTION

This machine is designed to fillet different types of boneless meat. The pieces of meat are placed on the right end of the conveyor belt. The belts, operated by motorised pulleys, pass the meat through the middle section, where motorised blades fillet the pieces of meat and come out at the other end of the machine.

4. MACHINE COMPONENTS

4.1. STRUCTURE

A bedplate for the different machine components, built of stainless steel and mounted on 4 adjustable legs or wheels, 2 of which are caster wheels with brakes. Sheets made of material suitable for foodstuffs (white polythene) are also screwed to the conveyor belt
