3-year warranty

V568 ST / V568 PF
Manual fish skinning machines

for **fish fillets, squid, flat fish, etc.**

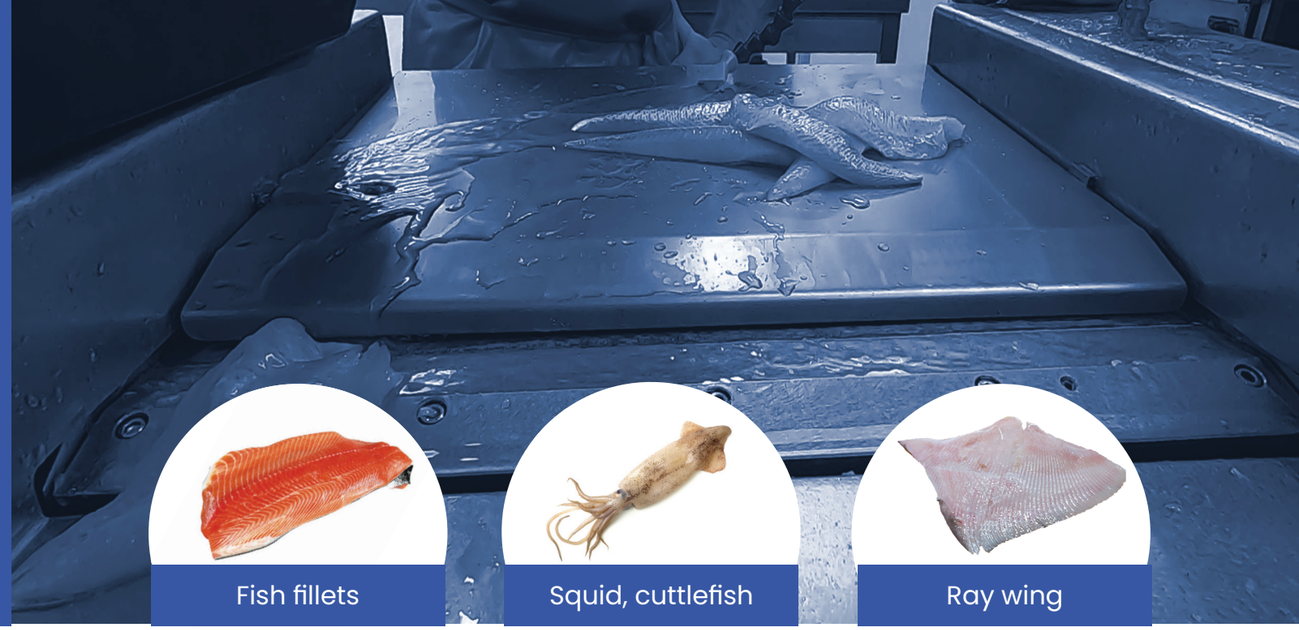

A manual machine to easily skin your products

- Easy to use
- Femoral control
- Water injection
- Interchangeable blade
- Double feeding table to improve the shine of small fillets (PF)

V568 ST and V568 PF
Fish skinning machines

The V568 is a manual skinning machine that is suitable for all types of fine skinned fish: flatfish such as sole, ray wings, cuttlefish, squid.
This versatile machine can be sold without a table (V568 ST) or with a table specially designed to skin small fillets (V568 PF). The table, with its surface watering, optimizes the shine and allows to keep the same rendering as a hand pulling.

The V568 can be used by fishmongers or in supermarkets, to work with different fish with a single machine. The teeth can be adapted on the same roller in order to skin fish of any thickness.
Finally, the optional engagement roller improves work safety and the quality of the final product.

Fish fillets

Squid, cuttlefish

Ray wing

Key features

1. Easy to use
